

FRONT END WIREFRAMES (Quick Mockups Created with Balsamiq)

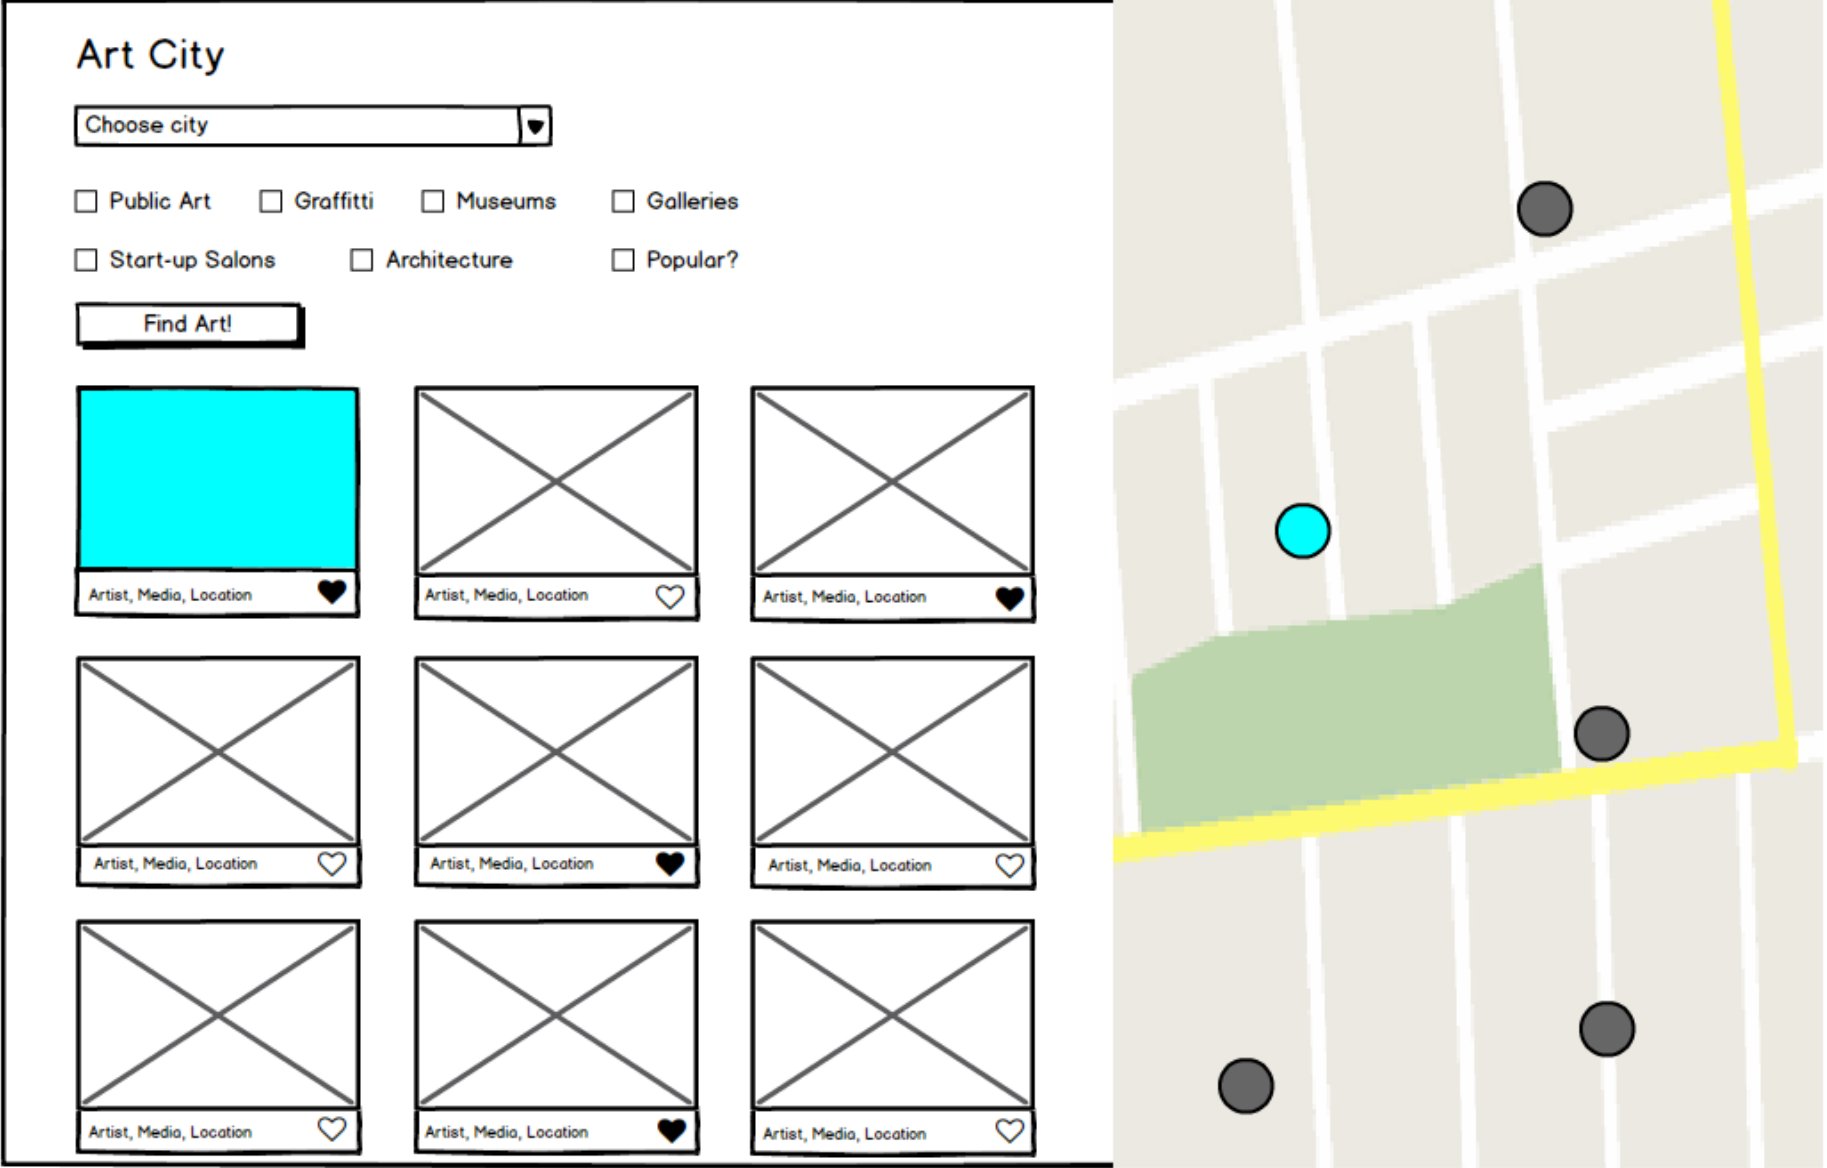

Front End Wireframe 1, version 1

Other name ideas:
1. ArtBeat
2. Artropolis

V1 might only have an upload area, no user collection

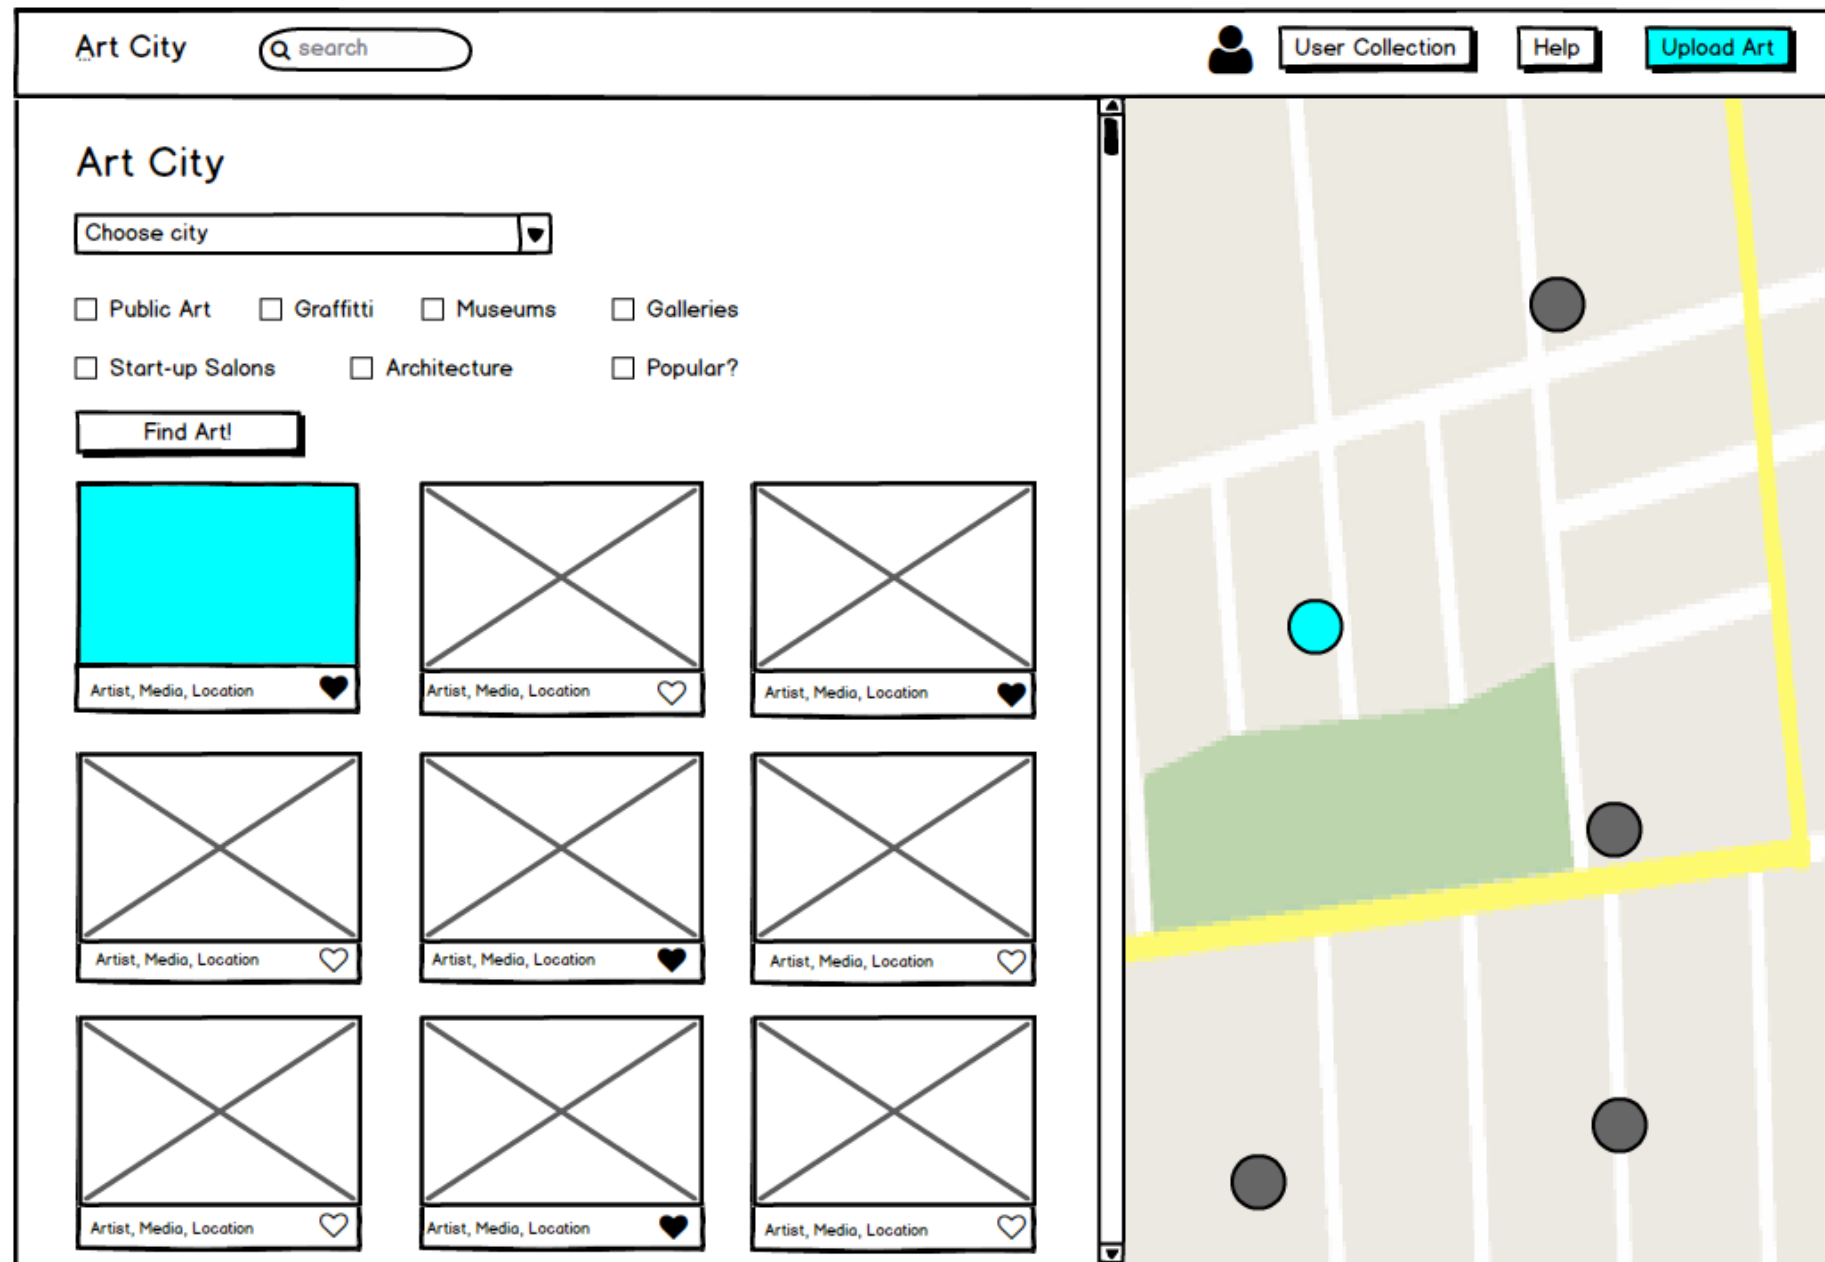

Public Art currently on display in Boston

Version 1 might not have Google Maps capability. In which case, the images would be 4 accross with significant more border area.

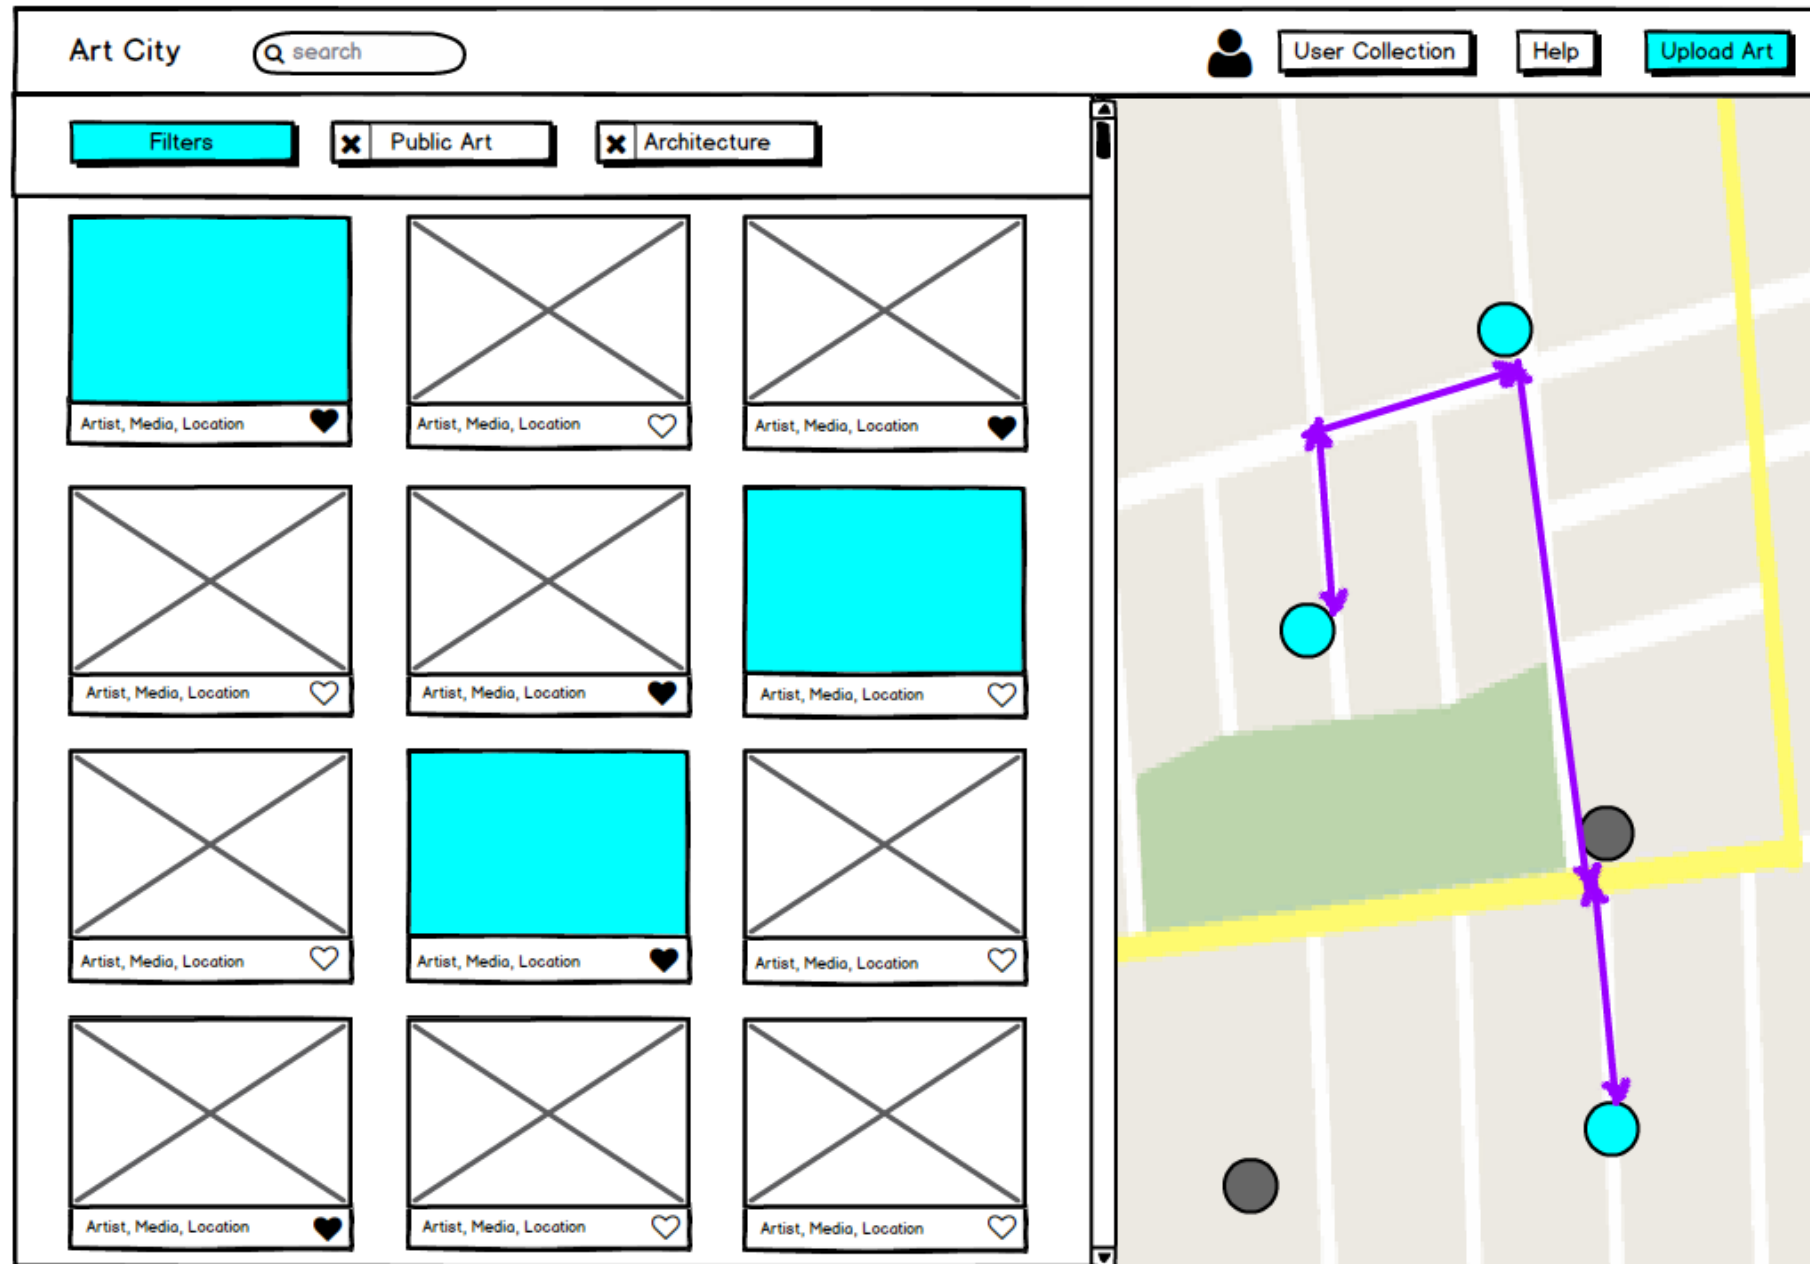

Front End Wireframe 2, v1

On scroll,
the hero
collapses
and the
menu bar
remains.

Eventually
will be a
user
collection
with 1)
Photos
uploaded by
the user, 2)
Images liked
and saved
by the user

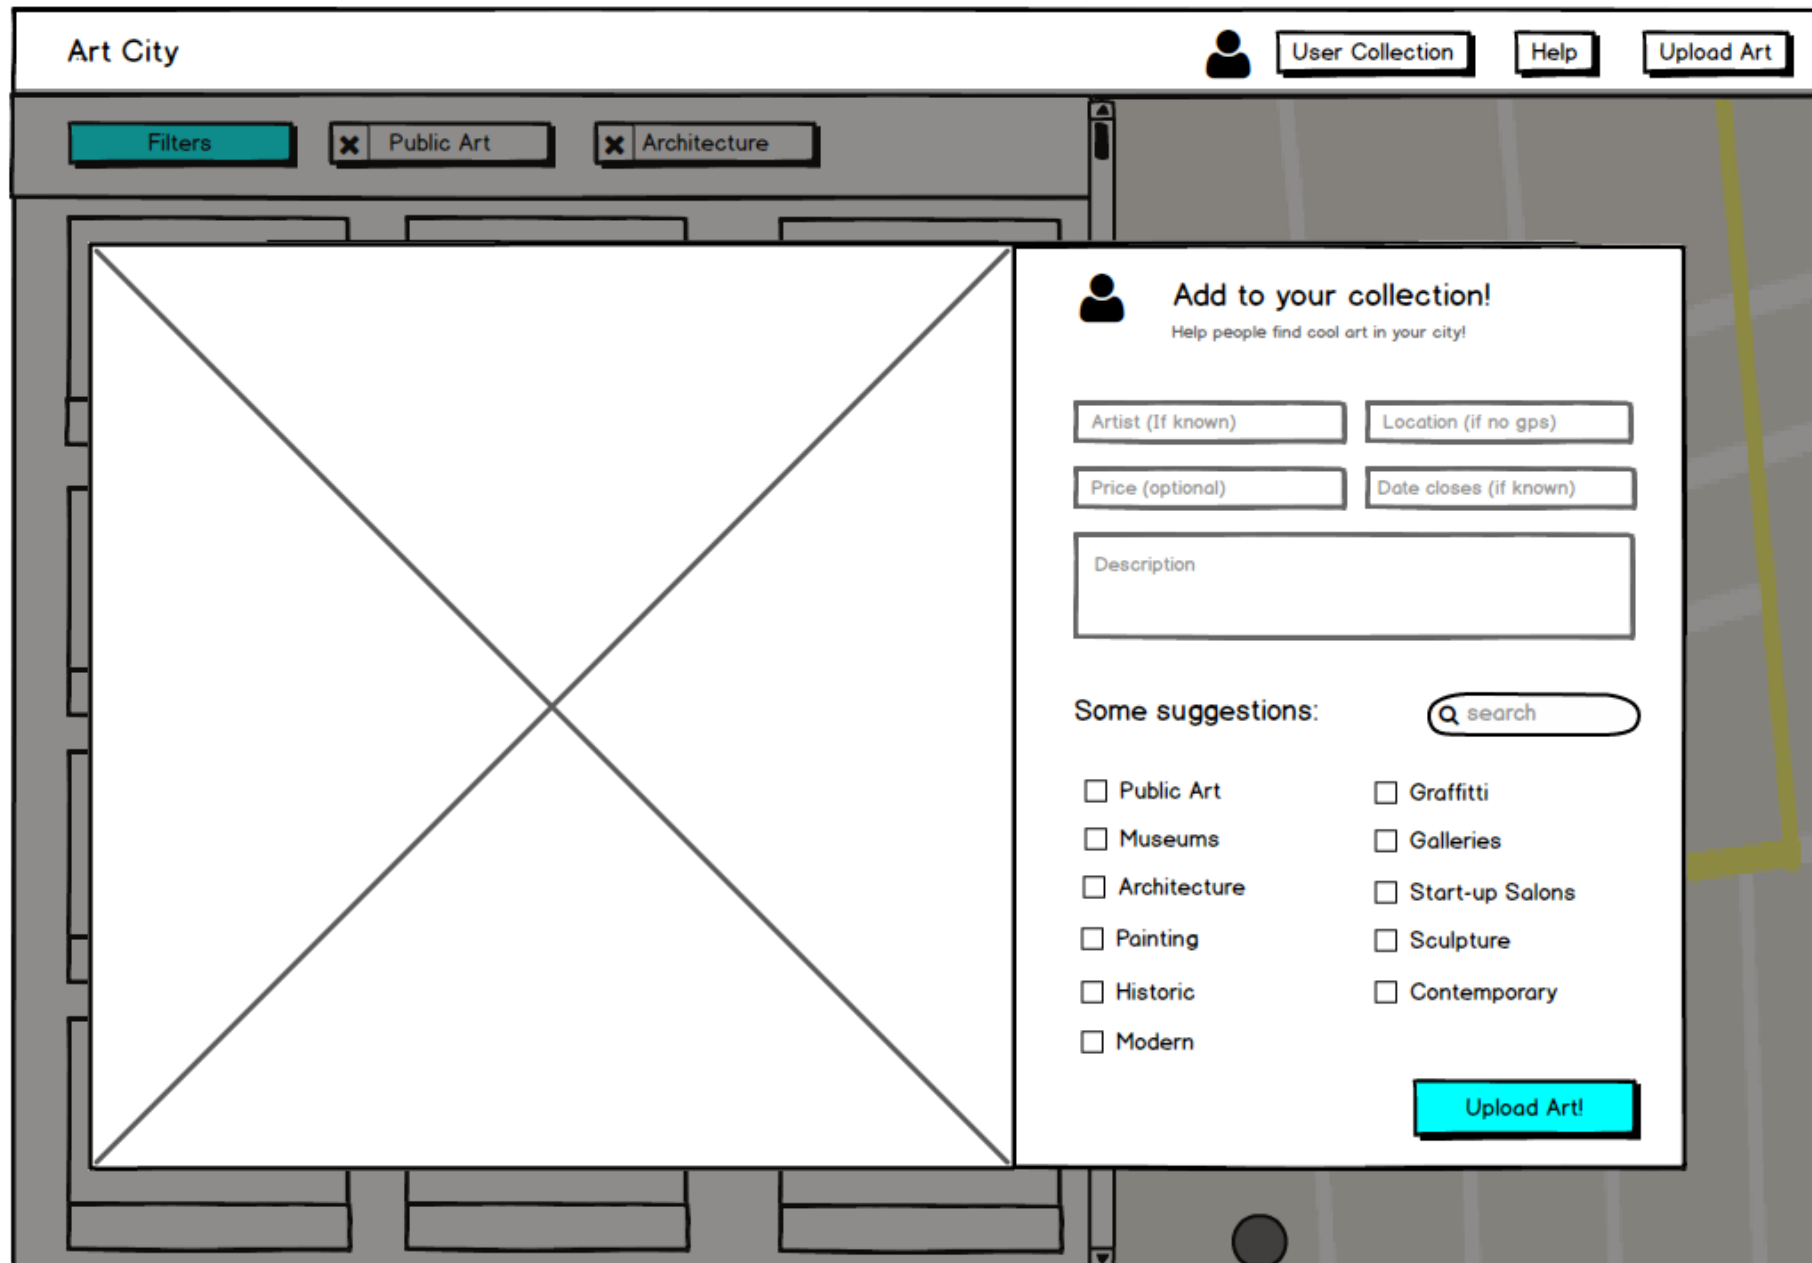

Front End Wireframe 3, v1

Scroll further and the filters collapse. Click on 'Filters' and the filters drop down. The user can close any filters they have already chosen as they scroll.

V3 will allow the user to create walking tours and be able to view other user's created tours. There might also be suggested routes for a particular day.

Front End Wireframe 4, v1

A wireframe of a web application titled "Art City". The header includes a user profile icon, "User Collection", "Help", and "Upload Art" buttons. Below the header is a filter bar with "Filters", "Public Art", and "Architecture" buttons. The main content area is split into a large map placeholder (indicated by a large 'X') on the left and a form on the right. The form is titled "Add to your collection!" and includes fields for "Artist (If known)", "Location (if no gps)", "Price (optional)", "Date closes (if known)", and "Description". Below these fields is a "Some suggestions:" section with a search bar and a list of categories: Public Art, Museums, Architecture, Painting, Historic, Modern, Graffiti, Galleries, Start-up Salons, Sculpture, and Contemporary. An "Upload Art!" button is at the bottom right of the form.

Art City

User Collection Help Upload Art

Filters Public Art Architecture

Add to your collection!
Help people find cool art in your city!

Artist (If known) Location (if no gps)

Price (optional) Date closes (if known)

Description
